Water Connections - Middle Boambee Policy

1 Purpose
Council has a requirement to restrict water connections in the Middle Boambee area and this policy defines such limits. The circumstances for the policy are that the supply main is a long dead end water reticulation main with limited flow capacity. Allowing connections greater than 100 could reduce supply to below the service standard to existing connections, especially at the end of the water reticulation main.

2 Policy
The following is Council’s Policy for water connection in Middle Boambee:

- The existing allotments with frontage to Middle Boambee Road and Lindsays Road be allowed a water metered connection to a total maximum of 100 connections.
- Any future subdivisions adjacent to Middle Boambee Road and Lindsays Road not be provided with a water connection to the existing water main.

3 Definitions
Reticulation Main: Gravity pressure main as part of the water supply distribution network

4 Key Responsibilities
