

Viewing the High Valued Arboreal Habitat Information Layers

1. Access the [online maps](#):
2. Zoom in with tool to see the area of interest
3. Make sure you have selected the draft High Valued Arboreal Habitat layer and also the High Valued Habitats overall layer (see red circled areas above).

What the layers mean ...

High valued arboreal habitats were classified into four categories:

- HV arboreal habitat category 1 — old-growth forest
- HV arboreal habitat category 2 — forest areas >10 hectares with ≥ 5 senescent trees per hectare
- HV arboreal habitat category 3 — forest areas 5–10 hectares with ≥ 5 senescent trees per hectare
- HV arboreal habitat category 4 — forest areas 1–5 hectares with ≥ 5 senescent trees per hectare.
